

Warmth for every requirement Comfort in every respect

Direct heaters and Storage heaters with classic technology for clean heat generation

A man with wavy blonde hair and a beard is sitting in the foreground, smiling and looking towards the camera. He is wearing a light-colored t-shirt and khaki pants. Behind him, a woman with curly hair is sitting on a bench, also smiling and looking towards the camera. She is wearing a light-colored t-shirt and pants. They are on a balcony with a black metal railing. The background is bright and out of focus.

Our hobbies bring balance to everyday life and help us to relax. We want it to be nice and warm, even when we get creative on the spur of the moment. Our direct heater delivers heat quickly, which is just what we need.

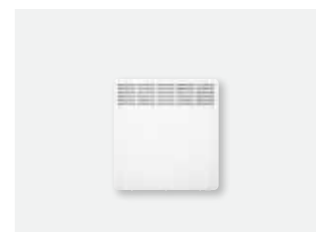

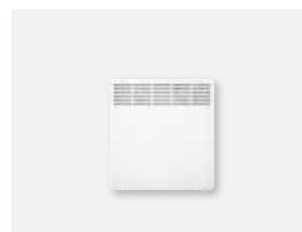

Comfort through technology

Find the best solution for your project

In the bathroom in the morning or in your recreational room for a few hours at the weekend – these occasions call for extra heat for a short time. The ideal solution here is an electric heater, which is particularly good at delivering precise amounts of heat. Since the appliances respond quickly, they make it easy and economical to provide heat accurately in specific rooms.

Direct heaters are especially suitable for rooms in your home that you rarely use or where there is no other form of heating. They are also ideal as booster heaters or interim heaters in spring/autumn. Our appliances offer you a convenient and flexible way to create a pleasant room atmosphere. And as they are powered by green electricity, the heat they supply is also carbon neutral.

Precision heating with style

Wall mounted convector CON Premium

With this direct heater, you enhance your room in two ways. The appliance not only provides pleasant warmth, but also blends in perfectly with your interior décor thanks to its high quality design. So you don't have to choose between warmth and style.

Flexible heat control

The wall mounted convector also plays to its strengths when it comes to convenience. Use the weekly timer to set a precise temperature for several days, or adjust the temperature spontaneously at the touch of a button for anything from ten minutes to two hours. When you air the room, the appliance switches off automatically.

What convinces this product

- › Wall mounted convector – ideal as an auxiliary heater or interim heater in spring/autumn
- › Even, quiet, air heating
- › High quality design with an aluminium front
- › Operating controls with illuminated LCD screen
- › Weekly timer, 120-minute timer, frost protection and open window detection
- › Control unit with self-learning capability: automatic calculation of the preheat time in timer mode
- › ON/OFF switch and overheating protection

Open window detection

Weekly timer

Short-time timer

With main plug

Convenient warmth exactly where you need it

Convactor CNS Trend M

Do you want pleasant temperatures in very specific places in your home? In addition to your central heating? Then this practical wall mounted convactor is the heater for you. Its slimline design makes it very easy to integrate.

Effective resistance to the cold

The slimline appliance is very robust and can therefore withstand even the chaos and commotion of everyday life. An integrated frost protection function precludes heating system failures due to low temperatures.

What convinces this product

- › Compact wall mounted convactor, ideal as an auxiliary heater or interim heater in spring/autumn
- › Extremely slimline design
- › Mechanical temperature controller
- › Safety through overheating protection
- › Robust design
- › Frost protection setting

With main plug

Heat that works in your space

Convactor CWM P

Even in small or cramped rooms, you shouldn't have to miss out on cosy warmth. That's why this heater is so compact. With a depth of just 10 cm, it is particularly slimline, requiring very little space for installation. Nevertheless, the appliance offers you excellent thermal comfort.

Enjoy a wide range of benefits

Although the wall mounted convactor blends very discreetly into your room, it supplies heat efficiently. Useful features contribute to its efficiency: the weekly timer and open window detection make operation easier for you.

What convinces this product

- › Wall mounted convactor – ideal as a supplementary heater or interim heater in spring/autumn
- › Even, quiet, air heating
- › Metal casing and slimline design
- › Operating controls with illuminated LCD screen
- › Weekly timer, frost protection and open window detection
- › Control unit with self-learning capability: automatic calculation of the preheat time in timer mode
- › ON/OFF switch and overheating protection

Unify warmth and serenity

Wall mounted rapid heater CK Premium

Heat has an even more relaxing effect if it doesn't cause any annoying noises. This direct heater works particularly quietly in silent mode, thanks to its special fan. We call it silent mode. At the same time, the heating output is so high that you can heat individual rooms quickly.

The finishing touch to your interior

The appliance impresses with its efficient operation and offers you numerous comfort functions, such as a practical weekly timer. For heat that is almost completely automatic. And the high quality design ensures the heater is a stylish element of your interior décor.

What convinces this product

- › Wall mounted rapid heater – ideal as a supplementary heater or interim heater in spring/autumn
- › Quick room air heating
- › High quality design with an aluminium front
- › Operating controls with illuminated LCD screen
- › Weekly timer, 120-minute timer, frost protection and open window detection
- › Silent mode with 1 kW base heating stage
- › Control unit with self-learning capability: automatic calculation of the preheat time in timer mode
- › ON/OFF switch and overheating protection

Feel the warmth quickly

Rapid heater CK Plus

This rapid heater gives you uncomplicated warmth – fast. With its high heating output, it quickly brings your rooms up to temperature. Thanks to its discreet design, it blends in easily.

A big impact that emerges quietly

The heater operates almost silently thanks to the integrated crossflow fan. So you'll be warm and cosy without any annoying noises.

What convinces this product

- › Wall mounted rapid heater – ideal as a supplementary heater or interim heater in spring/autumn
- › Very quick heating of rooms
- › Mechanical temperature controller
- › Small footprint
- › Ideal for the bathroom
- › Classic design

With main plug

A strong performance from a compact appliance

Wall mounted rapid heater CK Trend LCD

If you need heat particularly quickly, this rapid heater is perfect for you. It produces your preferred temperature straight away and does not require much in return: a power socket is all that is needed to connect this electrical appliance.

Effortless control and enjoyment

The heater is convenient to operate as the temperature controller is very easy to access. It is best to opt for the smallest version if installing the appliance in a particularly small recess.

What convinces this product

- › Wall mounted convector – ideal as a supplementary heater or interim heater in spring/autumn
- › Very quick heating of rooms
- › Compact appliance in a plastic casing
- › Operating controls with illuminated LCD screen
- › Weekly timer, frost protection and open window detection
- › Control unit with self-learning capability: automatic calculation of the preheat time in timer mode
- › Maximum safety thanks to three-stage overheating protection

Make heating easier than ever before

Rapid heater CK Trend

This rapid heater generates the required heat directly. It not only saves on space but is also easy to use. One power outlet is all that this electrical appliance needs.

User friendly operation

The temperature can be very easily regulated thanks to the convenient positioning of the controls. Furthermore, the appliance only needs a small space in which to get on with its task.

What convinces this product

- › Wall mounted rapid heater – ideal as a supplementary heater or interim heater in spring/autumn
- › Quick room air heating
- › Mechanical temperature controller
- › Maximum safety thanks to three-stage overheating protection
- › Small footprint
- › Ideal for the bathroom

With main plug

Make truly flexible use of your heater

Infrared quartz radiant heater IW

Integrate heat flexibly into your everyday life with this quartz radiant heater. The appliance brings your room up to temperature quickly and precisely. You can feel its radiant heat almost as soon as you switch it.

Don't restrict your heating to just one place

The heater is practical in your bathroom, for example, to give you a nice warm start to the day. And what about when you want to relax on the patio in the evening as the day draws to an end? Here, too, the quartz radiant heater is your ideal companion.

What convinces this product

- › Infrared quartz radiant heater with 1.2 kW heating output
- › Pleasant radiant heat for indoors or protected outdoor areas
- › Choice of three heating stages (0.4/0.8/1.2 kW)
- › Easy to adjust and operate
- › High quality metal casing

Being able to relax at home is important to us, especially after a hard day at work. Pleasant warmth helps us to do this. Our storage heater adjusts to suit our needs exactly and is really economical too.

Comfort through technology

The best solution for your project

Your desire for warmth is unique to you and should be as simple as possible to achieve. Our storage heaters are geared towards these needs. The intelligent C-Plus-Technology in these heaters continuously analyses your heat demand for the room and your personal heating pattern to automatically calculate how much heat you will need there the next day. All you have to do is sit back and enjoy the warmth.

High on heat – Low on space

Storage heater SHF 2000-7000

Despite its power, it has a modest appearance: this storage heater impresses with its high output when it comes to generating heat. However, this floorstanding model does not take up much space.

Intelligent room temperature control

Another benefit for you is that the appliance can also store heat for extended periods. This means it can bridge even long breaks between charging without any difficulties. The integral controller makes light work of adjusting the room temperature. When you ventilate the room, the heater switches off automatically.

What convinces this product

- › Compact, floorstanding storage heater with a high heating output
- › Intelligent automatic charging with C-Plus-Technology for convenient, energy efficient operation
- › Integral room temperature controller with weekly timer and open window detection
- › Easily accessible operating controls with illuminated LCD screen
- › Long service life
- › Extremely quiet operation due to low noise crossflow fan

Sustainable comfort

Electricity is the future. With the development of green technologies, we advocate innovative, environmentally responsible and futureproof building services – so that you can enjoy sustainable comfort at home. As a family business, we act for the future – yours and ours.

Since 1924, STIEBEL ELTRON has been synonymous with reliable solutions for domestic hot water, heating, ventilation and cooling. We maintain a clear focus in the energy debate: electricity, preferably harnessed from renewables, is the energy of the future. That is why we rely on approximately 5000 employees around the world for efficient heating solutions with green technologies.

From the design and manufacture of your appliance through to its maintenance, we systematically apply our expertise, strength of innovation and experience – gained from working with customers with high standards, such as yourself, and from the sale of more than two million appliances each year. We have the right solutions to meet every requirement. Solutions designed to raise the level of convenience in your home today and still be up to date tomorrow.

You can see first hand our commitment to green technology by visiting the Energy Campus at our head office in Holzminden, Germany. This training and communication centre is our flagship project for sustainable and resource-efficient construction. It combines the highest standards of architectural and communication quality. As a PlusEnergy building, it generates more energy than it consumes. Come and experience what our name stands for – in theory and practice.

Partnership with vision

We are a premium and sustainability partner of the Bundesliga football team Borussia Dortmund. As a heating expert, we are supporting the BVB on its path to a CO₂-free future.
