

Hygiene at your fingertips Service with style

Advanced technology for drying hands and saving costs in commercial environments

Hygiene plays a major role in the food service industry. Not only for staff, but also for our guests. To ensure people can dry their hands quickly after washing them, I've opted for efficient hand dryers. This even saves me money, which I can invest in other areas of my café.

Comfort through technology

Make the most of your opportunities

Are you responsible for sanitary fixtures because you run a café, own a restaurant or are a company owner who employs staff? Then you know how important comfort and hygiene are in these areas. Our high performance hand dryers are therefore an excellent choice. With their high air speeds, they offer short drying times.

Thanks to integrated sensors, your guests, customers or staff can use the appliances without touching them. Compared to paper and fabric towels, which you have to store and regularly refill, wash or dispose of, our technically advanced hand dryers are much more practical for you: once installed, they can be relied on to simply do their job.

Pick up speed

Ultronic hand dryer

We've built a lot of power into this appliance. With its strong and highly concentrated air flow at above 300 km/h, this high speed hand dryer is bound to impress. It takes less than 15 seconds to dry your guests' hands. With this appliance, you're well equipped to provide a reliable service in your sanitary facilities.

Benefit from air flow on demand

You don't need to worry about high consumption. In addition to the short drying time and low connected load, this hand dryer also features on-demand control. The infrared proximity sensor ensures that the appliance only runs when your guests need it. You benefit from top energy efficiency values.

Find the right design

A hand dryer should blend in well with its surroundings – and we've got you covered on this too. The diecast aluminium casing has won a design award. You can choose between a white or metallic version. Even more elegant is the model with brushed stainless steel effect.

Top product features

- › Extremely short drying time of less than 15 seconds
- › Elegant, classic design blends in harmoniously with any interior
- › Energy efficient and environmentally responsible
- › Very hygienic due to contactless operation
- › Vandal-proof thanks to impact-resistant metal casing

Experience power at low volume

HTT 5 hand dryer

This hand dryer is a real powerhouse that combines multiple benefits. Although powerful enough to dry hands quickly and comfortably with pleasant warmth, it operates quietly. This is an especially welcome feature for appliances installed close to office workspaces or restaurant dining areas.

Top product features

- › Short drying times
- › Low operating costs
- › Very hygienic due to contactless operation
- › Especially quiet
- › Vandal-proof thanks to impact-resistant metal casing

Integrate a suitable model

The diecast aluminium casing cuts a fine figure in even the most upscale of sanitary facilities. The appliance is available in signal white, anthracite metallic or silver metallic, which allows it to blend effortlessly into any ambience.

Impact-resistant metal casing

Put hygiene first

HTT 4 hand dryer

Small yet packed with vigour – that's what distinguishes this hand dryer model. It dries freshly washed hands in just a short time. Thanks to the sensor, the appliance does not need to be touched, which increases hygiene. Due to its particularly compact dimensions, this hand dryer can be easily integrated into public washrooms and is also ideal for locations with low traffic.

Top product features

- › Short drying times
- › Low operating costs
- › Very hygienic due to contactless operation
- › Especially quiet

Dry your hands comfortably and economically

HTE 4 | 5 hand dryer

Since hygiene plays an important role in sanitary facilities, we have also equipped this hand dryer with an infrared sensor. This switches the appliance on without the need to touch it. Users simply have to hold their hands directly below the air outlet. This also makes operation extremely economical.

Top product features

- › Maintenance-free, reliable operation
- › Low operating costs
- › Very hygienic due to contactless operation
- › Especially quiet
- › Vandal-proof thanks to impact-resistant metal casing (diecast version)

Don't put up with noise

The appliance dries hands remarkably quietly, so it is very suitable for areas where loud noise would be a nuisance. The exterior is also just right: the casing protects against damage, but at the same time features an elegant design.

Recharge your energy with ours

We need energy to live. As a family business, we endeavour to ensure that energy will still be available in tomorrow's world. That is why we advocate environmentally responsible and efficient building services that safeguard investment. We act for the future – yours and ours.

Since 1924, STIEBEL ELTRON has been synonymous with reliable solutions for domestic hot water, heating, ventilation and cooling. We maintain a clear focus in the energy debate: electricity, preferably harnessed from renewables, is the energy of the future. That is why we rely on approximately 3900 employees around the world for efficient heating solutions with green technologies.

From the design and manufacture of your appliance through to its maintenance, we systematically apply our expertise, strength of innovation and experience – gained from working with customers with high standards, such as yourself, and from the sale of more than two million appliances each year. We have the right solution to meet any requirement. Solutions designed to raise the level of convenience in your home today and still be up to date tomorrow.

You can see first hand our commitment to green technology by visiting the Energy Campus at our head office in Holzminden, Germany. This training and communication centre is our flagship project for sustainable and resource-efficient construction. It combines the highest standards of architectural and communication quality. As a PlusEnergy building, it generates more energy than it consumes. Come and experience what our name stands for – in theory and practice.
