

Hot water on the spot Efficient technology where you need it

Perfectly heated water with especially small instantaneous water heaters

Being able to wash her hands by herself means a lot to our daughter. Thanks to our mini instantaneous water heater, the water comes out of the tap quickly but is not too hot. This means our little one can feel like a grown up.

Comfort through technology

Make the most of your opportunities

Hot water is like a thread running through your day: freshening up in the morning, washing your hands at regular intervals, brushing your teeth at bedtime. Small to medium quantities often suffice for these purposes, which our mini instantaneous water heaters make available to you immediately with no effort at all, no matter whether they use hydraulic or electronic control. The compact dimensions are practical too, as they allow our appliances to blend harmoniously into your interior design scheme or even be installed out of sight.

Benefit from efficiency

The water is heated directly at the tap. As a result, there are no line or energy losses. Instead, the water is heated as it flows through the appliance and is available immediately at the required temperature. Even if consumption in your household increases.

Compact convenience that speaks for itself

EIL Premium mini instantaneous water heater

Your preferred temperature without the annoyance of heat loss from the pipework along the way – this mini instantaneous water heater brings you the “new normal”. The electronically controlled appliance is especially well suited to hand washbasins, where it will supply you with small amounts of warm water.

Enjoy hot water without any detours

This mini instantaneous water heater makes a convincing case for efficient DHW heating: since you connect the appliance directly to the tap and have the choice of installation above or below the washbasin, you save both water and energy. This is because there are no long pipe runs. There is no need to manually set the temperature either, making the appliance more practical and convenient for you to use.

Top product features

- › Mini instantaneous water heater with electronic control for small amounts of hot water available immediately
- › Flexible installation thanks to undersink or oversink mounting
- › Can be operated with pressure-tested or non-pressurised taps
- › Accurate temperature delivery up to the maximum output
- › Temperature limit internally adjustable from approx. 30 to 50 °C
- › Special aerator for perfect flow pattern
- › With standard plug (subject to model)

The fastest way to enjoy hot water

EIL Plus mini instantaneous water heater

Are there places in your home where you only need hot water occasionally? Then this mini instantaneous water heater is the right solution for you. The water quickly gets up to temperature thanks to decentralised installation.

Discover all the options

You retain flexibility, as the appliance can supply between two and four litres per minute, depending on the model. Since the instantaneous water heater is easily combined with commercially available pressure-tested taps, it proves to be extraordinarily adaptable.

Top product features

- › Mini instantaneous water heater with electronic control for small amounts of hot water available immediately
- › Suitable for undersink installation
- › Can be operated with pressure-tested or non-pressurised taps
- › Special aerator for perfect flow pattern
- › With standard plug (subject to model)

The flexible way to freshen up

EIL Trend mini instantaneous water heater

Do you want a reliable supply of hot water to your hand washbasin without wasting energy? Then choose this mini instantaneous water heater. Its direct connection to the tap and fast bare wire heating system ensure that DHW is available for you immediately.

Adapted to your needs

Since this appliance is very small, you have plenty of options for where to install it, such as in your guest bathroom. Furthermore, as it is so adaptable, this instantaneous water heater can be mounted either above or below the washbasin.

Top product features

The EIL 3/4/6 Plus can also be operated with a mains power supply of 200 V, 220 V or 240 V. The EIL 7 Plus can also be operated with a mains power supply of 380 V. The EIL 3/4/6 Trend can also be operated with a mains power supply of 200 V, 220 V or 240 V.

Recharge your energy with ours

We need energy to live. As a family business, we endeavour to ensure that energy will still be available in tomorrow's world. That is why we advocate environmentally responsible and efficient building services that safeguard investment. We act for the future – yours and ours.

Since 1924, STIEBEL ELTRON has been synonymous with reliable solutions for domestic hot water, heating, ventilation and cooling. We maintain a clear focus in the energy debate: electricity, preferably harnessed from renewables, is the energy of the future. That is why we rely on approximately 3900 employees around the world for efficient heating solutions with green technologies.

From the design and manufacture of your appliance through to its maintenance, we systematically apply our expertise, strength of innovation and experience – gained from working with customers with high standards, such as yourself, and from the sale of more than two million appliances each year. We have the right solution to meet any requirement. Solutions designed to raise the level of convenience in your home today and still be up to date tomorrow.

You can see first hand our commitment to green technology by visiting the Energy Campus at our head office in Holzminden, Germany. This training and communication centre is our flagship project for sustainable and resource-efficient construction. It combines the highest standards of architectural and communication quality. As a PlusEnergy building, it generates more energy than it consumes. Come and experience what our name stands for – in theory and practice.
