

# RTI-EP2

TEMPERATURE CONTROLLER

PRODUCT-NO.: 182027

The RTI-EP2 is proportional room temperature controller with full electronic control for integration into the storage heater control panel for the ETS, ETW and ETT. The required room temperature can be selected at the storage heater without any additional installation effort. The storage heater fan is regulated automatically; its speed is matched to the temperature differential. This ensures a constant and even heat transfer into the room. The controller is additionally equipped with its own ON/OFF switch and an additional switch for an optional booster heater in the storage heater that ensures a comfortable room temperature, even when temperatures suffer a sudden fall. The room temperature can be variably selected between 5 °C and 30 °C. May also be used in conjunction with decorative tiling.

## The main features

Electronic room temperature control

---

ON/OFF switch

---

Breaking capacity 100 VA

---

Breaking capacity for booster heater 10 A, 230 V

---

Switching differential  $\approx 1$  K

---

Possible temperature setback of approx. 4 K via an external switch/time switch

Type

RTI-EP2

Part no.

182027

**Installation information**

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
