

SNU 5 SL + MAE-W

SMALL WATER HEATERS 5 TO 15 L

PRODUCT-NO.: 222172

A strong team. The small water heaters in a set with a sink or washbasin tap are suitable for connection to a single draw-off point. The highly effective thermal insulation ensures the lowest energy losses. The temperature can be infinitely adjusted on the appliance, so the water you draw will always be of the same temperature. The high limit safety cut-out ensures a safe maximum outlet temperature. As an option, this can be limited to 45, 55 or 65 °C.

The main features

Small water heater, 5 litre capacity

2 kW connected load

Set including a mono-lever mixer tap

Tap either as sink or basin tap

Easy installation with connection hoses for mono-lever mixer taps

Plug-in unit for electrical connection to any standard socket

Type	SNU 5 SL + MAE-W
Part no.	222172
Connected load	2 kW
Width	263 mm
Depth	230 mm
Height	421 mm

Technical data

Connected load	2 kW
Width	263 mm
Depth	230 mm

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
