

WST

MIXER TAPS

PRODUCT-NO.: 232620

Mixer taps as mono-hole version are the ideal match for small open undersink water heaters. They are equipped with a mixer valve that allows the ideal temperature to be preselected. Every temperature - from cold to hot - can be selected. The required water volume is selected via the draw-off tap. The optimum water temperature is always available at the tap, without long adjustment time.

The main features

Mixer taps as basin or kitchen version

Convenient selection of the required temperature

Optimum utilisation of the mixed water volume in the small water heater

Type	WST	WUT
Part no.	232620	232604

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
