

KBA 5 KA

KBA 5 KA

PRODUCT-NO.: 074289

Equipped with a high-grade plastic container, the water boilers quickly bring the water to boil. The hot water is safely and conveniently drawn off through the integral tap, which is available in a classic chrome or plastic version. There's no need for all that pouring and re-pouring when brewing large volumes of tea, for example, so reducing the risk of scalding. Equally, very small volumes of water – such as for a single cup of tea – are brought to the boil safely and economically. The temperature is variably adjustable and the appliance switches off automatically once the required temperature has been reached.

The main features

Water boiler

5 litre plastic container with chrome tap

Variable temperature selection

Boiling point sensor and automatic OFF control

Cold, warm or boiling water from one draw-off point

Type	KBA 5 KA
Part no.	074289
Width	325 mm
Height	295 mm
Depth	197 mm
Colour	grey

Technical data

Capacity up to	5,0 l
Connected load	2 kW
Power supply	1/N/PE
Rated voltage	230 V
Frequency	50 Hz
Container material	Plastic
Weight	2,9 kg

Height to the centre of the water connection
