

SOL SV-R

COLLECTOR ACCESSORIES

PRODUCT-NO.: 230188

The SOL SV-R push-fit connection ensures the hydraulic connection of a collector assembly to the flow and return of a solar thermal system. The push-fit connection is intended for hydraulic connection of collectors for roof integration. The push-fit connection is required if more than 5 collectors for roof integration are installed side by side. The fixing clips included in the standard delivery enable installation of all push-fit connections without tools.

The main features

All important components for the source side are pre-assembled

Faster installation

Easy installation

Secure hydraulic connection

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
