

FEB 2.1

ACCESSORIES

PRODUCT-NO.: 206612

Convenient, straightforward control of your ventilation unit

This programming unit is combined with our central ventilation units and gives you convenient control. It lets you set the most important system parameters, such as the air flow rate that is supplied to the rooms.

Superior air quality thanks to integral sensor

Especially helpful: the integral air quality sensor that reads the CO₂ concentration in the rooms. An excessively high value indicates poor air quality, which can also cause health problems. Thanks to the sensor, the air flow rate in your home is automatically adjusted. The plain text matrix display makes operation especially intuitive, plus you can choose from eleven languages.

The main features

Convenient operation of the system from the living space

Air quality sensor for demand-dependent control

Operating mode can be switched easily via the Touch-Wheel

Several languages available as standard

Suitable for LWZ 180/280, LWZ 130 and LWZ-W 450/600

Type	FEB 2.1
Part no.	206612

Technical data

Air quality sensor	CO2
IP rating	IP22
Colour	white
Rated voltage	5 V
Width	145 mm
Height	96 mm
Depth	31 mm

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
