

LA 50

DECENTRALISED

PRODUCT-NO.: 234656

The LA 50 is a radial extractor with star-shaped noise attenuating elements, which minimise noise pollution. It is designed so that the extract air can be routed outdoors from damp rooms such as the kitchen, bathroom and WC through house walls. Supply air is provided via adjacent rooms. The high efficiency of the fan reduces operating costs. It is easy to install and operate. Visually appealing design thanks to a contemporary, white inner bezel. In conjunction with the LA 30 WRG, this creates a complete mechanical ventilation system.

The main features

Extremely quiet operation

Easy to install and operate

Excellent energy efficiency

Easy to change filter

Operation via ZLA 30 S3 BVU or RCT

240 mm minimum pipe length

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
